

## R 2360 USE OF TECHNOLOGY

To take full advantage of technology and telecommunications opportunities, and to protect computer hardware and software from tampering, each member of the school community must agree to act responsibly.

Pupils shall agree to:

1. Access computer hardware and software responsibly;
2. Not tamper with the documents of others stored on any media;
3. Discourage those who act to sabotage programs or machines and to report such actions to school authorities;
4. Not misuse of networked or on-line services that jeopardizes school subscriptions to such services and therefore seriously limits research potential.

Adopted: 27 November 2000
